

The procedure of installing Microsoft® .NET Framework

1. Introduction

When the following window is displayed during installation, it is necessary to install Microsoft® .NET Framework on your computer according to the following procedure.

If your computer is connected to the Internet, you can install Microsoft® .NET Framework from Microsoft Web Site.

Confirmation procedure of software which installation is necessary

Select [Add or Remove Programs] from the Control Panel.

*In Windows Vista or Windows 7, select [Uninstall a program].

If “Microsoft® .NET Framework 3.5 Service Pack 1” is not displayed in the list, it is necessary to download .NET Framework 3.5 Service Pack 1 from the below URL and install them.

*If Microsoft® .NET Framework (Version) which includes English resource has been installed, Microsoft® .NET Framework Language Pack is not displayed in English version OS.

2. Installation procedure

If the following link is clicked, it jumps to Microsoft Site (United States).

[.NET Framework 3.5 Service Pack 1 Download](#)

[.NET Framework Version 3.5 SP1 Language Pack Download](#)

* Change language as needed and download the software.

* Logon as the user of administrator authority and install it.

* Microsoft® .NET Framework Language Pack is not necessary in English version OS.
