| **4.12.1 BASIC**  
HDD Full: Here is for you to select working mode when hard disk is full. **There are two options: stop recording or overwrite.** If current working HDD is overwritten or the current HDD is full while the next HDD is no empty, then system stops recording. If the current HDD is full and then next HDD is not empty, then system overwrites the previous files.  
Pack Duration: Here is for you to specify record duration. The value ranges from 1 to 120 minutes. Default value is 60 minutes. | **4.12.1 BASIC**
