About the minimum pull-out strength

For the mounting screws or anchor bolts, the "Minimum pull-out strength" value is described in the "Instruction Guide".

The minimum pull-out strength is a value determined by the following conditions, etc., and indicates the value required to safely install and hold products such as cameras.

- Strength of the material of the mounting location
- Materials and dimensions of the screws and anchor bolts

When selecting a mounting location, screw, anchor bolt, etc., please ensure this minimum pull-out strength.
