

- When multiple cameras are connected to the same 24V AC power source and the 24V AC power is off, power may not be supplied from a hub with PoE function. Use separate 24V AC power supplies for each camera when connecting to the cameras together a hub with PoE function and 24V AC power supply. If separate 24V AC power cannot be used, disconnect the 24V AC power cable when supplying power from a hub with PoE function.

Applicable models : PTZ (pan, tilt, zoom) type camera that supports 24V AC power
