

## ■ Introduction

This article describes how to switch your default web browser to Internet Explorer after installing Windows 10 update which sets Microsoft Edge as the default web browser instead of Internet Explorer.

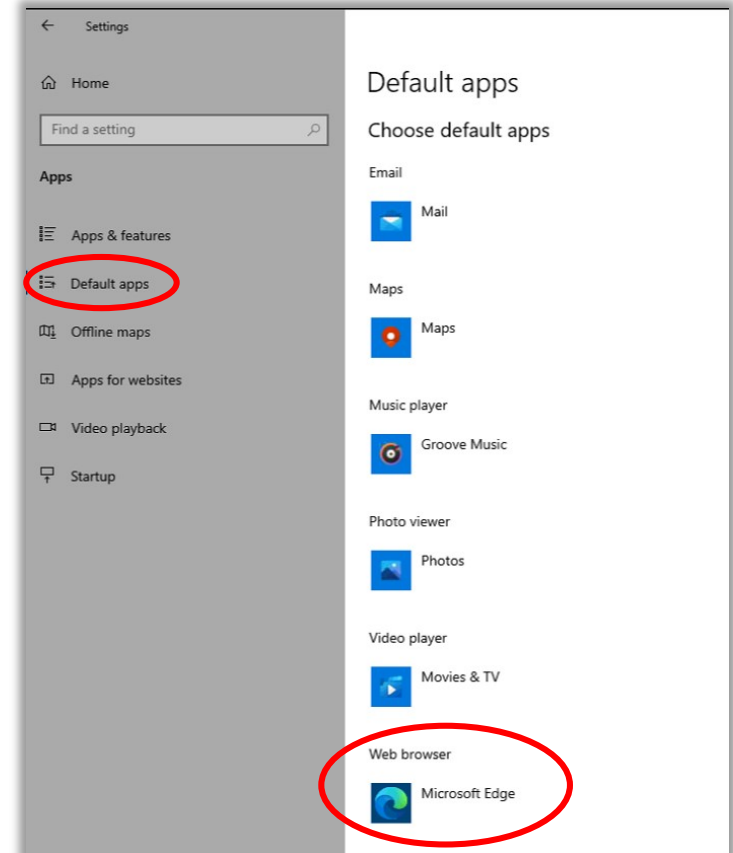

1. Click the start button and select “Settings”

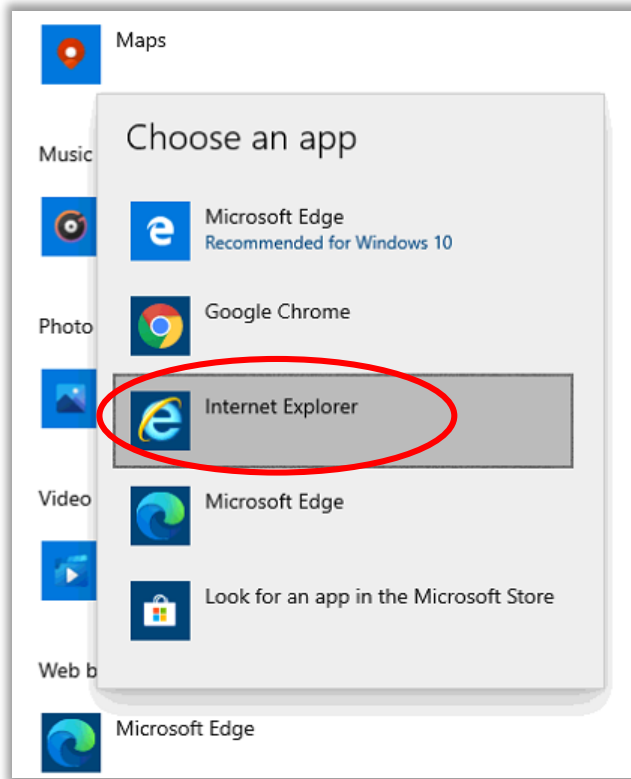

2. Click “Apps”

3. Click “Default apps”, and then click the button under “Web browser”

## 4. Select “Internet Explorer”

## 5. Confirm that “Internet Explorer” is now selected for “Web browser”
