

## How to find if "HEVC codec" for playing H.265 video is installed on your PC by using "Movies & TV" tool

1. Copy the file recorded in H.265 format to the computer, press the right mouse button on the file, select "Open with", and activate the "Movies & TV" tool.

2. Depending on the presence or absence of "HEVC codec", the screen may differ as follows:

The video will be played normally if the HEVC codec is already installed.

The selection screen will be displayed the HEVC codec is NOT installed.
