

Precautions for Using PoE+ Cameras Manufactured by Panasonic

When a new coaxial LAN converter is used for any of the following PoE+ cameras manufactured by Panasonic, the camera may not start up.

Take the corrective measure described below.

**Model numbers: WV-SW395, WV-SW395A,
WV-SW396, WV-SW396A**

Manufactured in: Nov. 2014 to Oct. 2015

(Serial numbers: NKV*** to OJV*****)**

■ Corrective measure

New coaxial LAN converter (camera side)

At the time of installation, connect a grounding lug to the camera ground or earth ground by using the screw used to fix the BNC connector.

- * Recommended grounding lug
R1.25-3 of Japan Solderless Terminal (JST)
