

## *Estimated storable number of JPEG images onto SD Memory Card*

- Please refer to the operating instructions for finding applicable resolutions on each model.
- We recommend you to make a backup of SD memory card because you may lose the data for a long period of time to leave it.
- Please note that SD memory cards are subject to failure before rewriting number of times the upper limit, the media and stored data corruption. Also we recommend you to check operation regularly if you cannot receive the abnormality notification of the SD memory card by e-mail, alarm notification or LED.
- **The storable numbers of images are estimated and not guaranteed for storable exactly.**
- **The storable numbers of images vary depends on the subject.**
- The SD memory card, has decided minimum size (cluster size) to be consumed when you save the file, and then consume the capacity in the cluster size units. For example, if the cluster size is 32KB of SD memory card, both files of 5[KB] and 20[KB] consume 32[KB]. Therefore, **the storable number of images might not be changed** even if picture quality were changed. The cluster size is decided by size of SD memory card. Also, **the storable number of images might not be increased** even if the size of SD memory card were increased.

# The estimated storable number of JPEG images on SD memory card

## Revision history

April 9, 2018	Added Image capture size 2192x2192.
November 9, 2018	Added Image capture size 3072x1728, 2560x1440 and 3072x2304.
May 27, 2019	Added Size of SD memory card 256GB. Corrected the number of storable images at "Image Quality 1" of the size of 128GB SD memory card in the 1600 x 1200 of image capture size.
April 7, 2021	Added Size of SD memory card 512GB.
